ULTI

Programmable wireless lighting system

CLIPSAL by Schneider Electric

The ultimate in lighting

Lighting is an essential element in all our homes. It can be used to create an array of ambiences, reflect our mood, be changed to suit different activities, as well as enhancing the interior design. Via wireless controls, you can define the lighting throughout your home to add a touch of luxury.

One-touch scene control

With just one touch, you can choose a pre-set lighting scene, giving the exact atmosphere you desire. By controlling the combinations of light groups within your home you can create scenarios that perfectly complement and enhance your interior design and functional needs. As your mood or requirements change, why not the lighting?

Life pure and simple

The philosophy behind the ULTI system is simple: to let you create the lighting moods you desire in every room of your home, and to help you achieve them easily and flexibly. With ULTI, you control the atmosphere, maximising the impact of your design scheme with the minimum of fuss. Completely retrofittable, easy to programme and use, safe and reliable in operation. What could be simpler?

Programmed in minutes.

The ULTI system is quick and easy to install. Designed to be completely retrofittable and operating with wireless transmission, no costly and troublesome rewiring is required. You just use it to replace your existing switches or install it during construction.

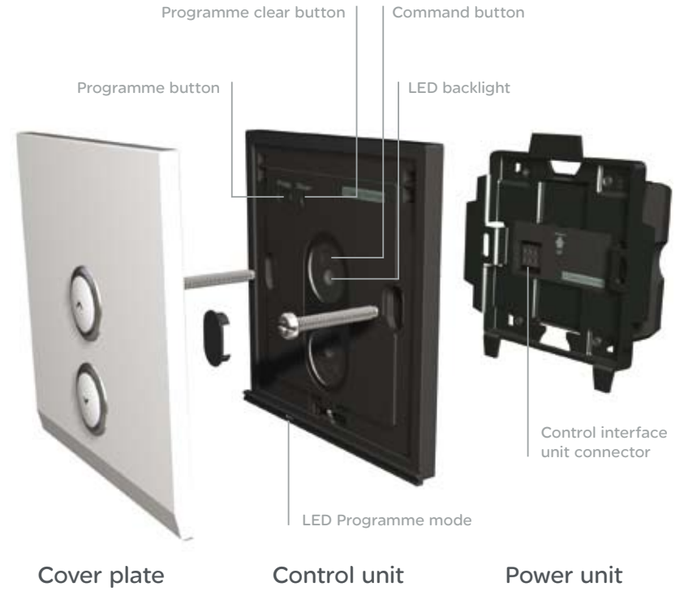
And programming couldn't be easier, it's just three simple steps:

1. set the remote and switches to Programme Mode
2. adjust the lighting scene
3. set it and you're done.

The one remote unit can control an almost infinite number of switches, along with the lighting scenarios individually created by you.

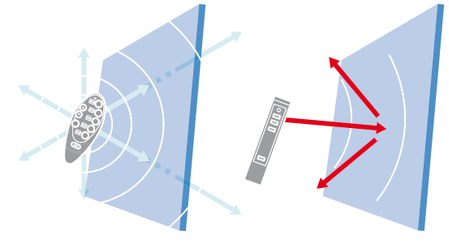
RF boundless communication

With RF boundless communication each ULTI remote can control any light in your home since all the switches are loaded with our patented wireless receivers. Our radio frequency (RF) technology gives you a seamless integration of all your lighting switches. ULTI gives you the luxury of wirelessly controlling any lighting switches with pre-programmed lighting scenes virtually through walls. The control signals go beyond four walls to cover a remarkably large radius, which lets you control the lights from anywhere in a typical 3,000 to 4,000 square foot space.



Simple on the surface

Advanced technology within ULTI uses a 434 MHz radio frequency, enabling it to cover a very large area. To make ULTI completely retrofittable, we developed a patent-pending proprietary protocol that enables reliable data transmission and requires low power consumption. The retrofittable technology of the ULTI system is a complete design breakthrough. Each handheld remote has a unique identification code that helps to avoid interference. And for your peace of mind, auto-load failure detection and an override switch provide extra safety to all users.



Simple to use

At the heart of the ULTI system lies the principle of operation simplicity. The elegant remote control unit does everything at the push of a button. This unit is ergonomically designed to fit snugly into your hand; its use of wireless transmission means you can operate it from any angle. Along with other convenient features of our system such as sensible backlit buttons, master dimming, all-off function and our signature light rings on the switches, ULTI is designed with your needs in mind.

Light touch

ULTI's light touch buttons have a blue or amber backlight that gives out a soft gentle glow and lets you find them easily in the dark.
The ultra slim switches have delicate and graceful contours adding a modern and sleek feel to your home, office or hotel design.

Your choice

To complement your decor, you can choose the colour and shade you desire from our current offerings, including crystal glass, champagne gold, brushed silver and pearl white finishes.

Total solutions

Power, data and TV wall sockets are also available to complement the ULTI Epic wireless system, providing users with consistent aesthetics for a superior, high end finish.

Flexible and expandable

As your needs or tastes change, so can the ULTI system. You can change lighting scenes, add more lights, switches and dimmers as your requirements expand. Moreover, the flexibility of ULTI means it can also accommodate many types of electrical device. And ULTI is just as comfortable in the office for those vital and demanding commercial applications.

Step 1 Select switch and dimmer base units

Switches and dimmers

With no complex components or wiring, ULTI's ultra-slim switch and dimmer will slot neatly into your existing light switch housings. Once installed, you can simply start creating and storing your ideal lighting settings.

Lamp dimmer

In no time at all, the innovative ULTI lamp dimmer can just as easily be integrated with your table and other free standing lamps.

Step 2 Select required cover plate and finish

ULTI is available in our unique range of materials giving you a sensual surface and an artful switch. From classical to minimalist, we have a style to complement your design. From crystal glass, champagne gold, brushed silver and pearl white finishes.

Step 3 Select handheld remote control

FreeLocate switches

ULTI radio frequency (RF) remote control units offer you 360° coverage and boundless connectivity. ULTI's sleek, stylish, ergonomically designed remote control units are designed to fit into your lifestyle effortlessly.

FreeLocate switches

FreeLocate switches enable remote operation of lighting moods. They are wire-free, battery operated and can be attached to virtually any surface and position including glass and other smooth materials.

Step 4 Select additional products (if required)

Socket series

The power, data and TV wall sockets come in a range of colours and materials which are also identical to your ULTI switches and dimmers, achieving a beautifully coordinated design motif throughout.
